NetFORCE-12XPR™

SYSTEM OVERVIEW

Our NetFORCE-XPR™ series of rugged industrial computers represents years of field-proven refinement driven by our commitment to deliver market-leading performance, reliability and value.

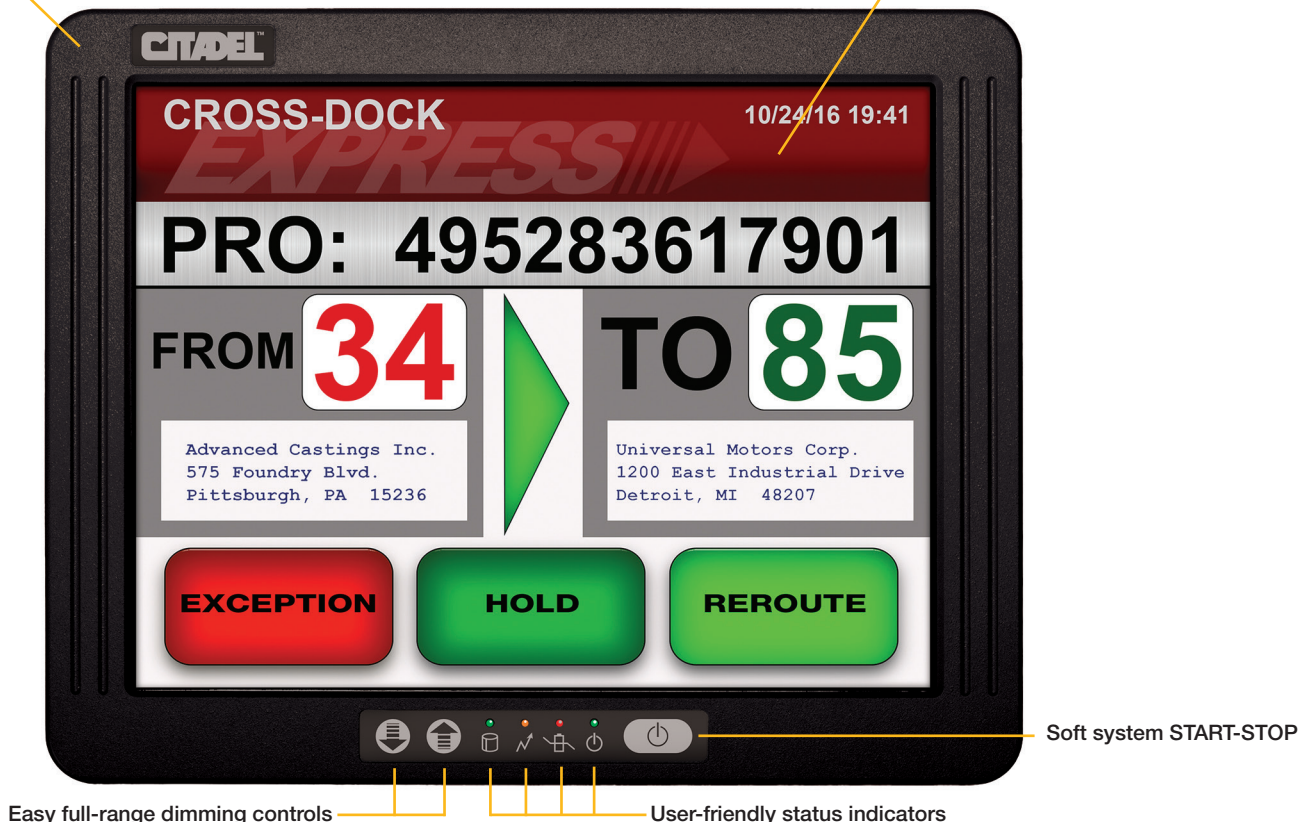

These rugged fully-sealed systems deliver reliable horsepower in your most challenging harsh-environments. Their advanced 64-bit quad-core CPU, high-performance graphics, 'glove compatible' touch screen and bright high-visibility displays offer an outstanding level of performance and operator convenience.

A wide-input DC-power system with battery backup keeps your applications up-and-running. NetFORCE-XPR™ systems withstand extremes of temperature, physical shock, vibration and environmental contaminants common to heavy industrial and weather-exposed installations.

- Advanced 64-bit quad-core CPU supporting 16-Gbytes DDR3 DRAM
- Enhanced 12.1" XGA display / 1024 X 768 / 16-million colors
- Intel dual-band Wi-Fi - 802.11abgn / 802.11ac / Bluetooth v4.1 / CCX
- Industry standard 10/100/1000 Industrial Gigabit Ethernet
- 12/24 - 60 VDC power system with internal UPS battery back-up
- Fully sealed NEMA-4 / IP-66 water-tight die-cast aluminum enclosure
- Rugged, fast solid-state 256-Mbyte+ SSD mass storage
- High-resolution 'glove compatible' touch screen
- Rugged, high-performance 'no break' flexible antennas
- mini-PCI Express expansion slot [CANBUS / GPS / custom I/O, etc.]
- Cold-start system preheater and integrated 'no frost' display options
- O/S compatibility: Windows 7 Pro/WES, Windows 10 IoT / Linux, etc.

Rugged aluminum enclosure fully sealed to NEMA 4 / IP-66

Bright 1024 X 768 XGA display with high-resolution touchscreen

NetFORCE-12XPR™

TECHNICAL SPECIFICATIONS

System CPU and Memory

Advanced QUAD-CORE 64-bit CPU supporting up to 16-Gbytes DDR3 System DRAM

Enhanced LCD Display & Touchscreen

Resolution: 1024 X 768 XGA --- Brightness Enhanced / Sunlight readable options

Viewing Area: 12.1" diagonal with high-resolution 'glove compatible' touchscreen

Video-blanking: automatic vehicle in-motion screen-blanking fully-supported

Mass Storage and Networking

High-performance SSD: 256-Mbytes (or more)

Wireless Networking: INTEL dual-band 802.11abgn / 802.11ac / Bluetooth v4.1 / Cisco CCX

Industrial Gigabit Ethernet: 10/100/1000 (cabled)

System Expansion

Internal mini-PCI Express slot accepts industry standard options for I/O expansion such as:

CANBUS / GPS navigation / analog & digital I/O, etc.

Fully-sealed NEMA-4 / IP-66 Power & I/O Industrial Interconnects

Power ON/OFF | DC-PWR IN | Keyboard & mouse | Dual USB | Industrial Ethernet |

Optional External Horn | RS-232 COM ports | External Coax Antenna Connector, etc.

Input Power

24 to 60 VDC (nominal)

12 VDC with optional cable adapter

72 VDC & above (multiple high-voltage options)

90-220 VAC 50/60 Hz. Universal AC Adapter

Total Input Power: < 60 watts (maximum) / Internal UPS (standard)

Environmental Specifications

Rating: UL50E Type-4 / NEMA-4 / IP-66

Temperature: -20 C to +50 C (operating)

Humidity: 0% - 95% (non-condensing)

Vibration: MIL-810F 2.0 G (15-1000 Hz.) (operating)

EMI/RFI: FCC Part-15 / MIL-STD-461E

Mechanical Specifications

Mounting: 2.5" Flex-mount ball and 75mm VESA mount

Width: 12.00" (30.50 cm)

Height: 9.50" (24.13 cm)

Depth: 2.50" (6.35 cm)

Weight: ~8 lbs. (3.64 kg) (typical)

Rugged aluminum enclosure fully sealed to NEMA 4 / IP-66

Fully sealed power and I/O certified to NEMA 4 / IP-66 with custom I/O options available

NetFORCE-12XPR™

MECHANICAL DIMENSIONS

Since 1979, Citadel Computer Corporation has focused on the design and manufacturing of rugged industrial computers for challenging harsh-environment industrial and military applications.

Our systems combine state-of-the-art processing technology with practical real-world engineering to deliver reliable computing horsepower that withstands extremes of temperature, physical shock, vibration and exposure to the elements.

As reliable platforms performing a wide spectrum of tasks, Citadel systems are in service around globe supporting advanced processes, research and control for many of the world's leading companies.
